

Briston will attend the Air Force Academy; Parker will attend West Point; John Paul and Katie will attend the Naval Academy; and Karrington will attend the Naval Academy Preparatory School.

Arkansas has a history of academy alumni. These include General Douglas MacArthur—Supreme Allied Commander in the Pacific during World War II, and Brigadier General William O. Darby, leader of what would later become the Army Rangers. Their example is one of courage and excellence under any circumstances. With this rich tradition before them and through their own accomplishments, there's no doubt these students will do their very best—bringing honor to themselves, their families, and their state.

I wish them well in their service careers and success in whatever they pursue.

INTRODUCTION OF THE COMPASSIONATE ACCESS, RESEARCH EXPANSION AND RESPECT STATES (CARERS) ACT

HON. STEVE COHEN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 15, 2017

Mr. COHEN. Mr. Speaker, I rise today to introduce the Compassionate Access, Research Expansion and Respect States Act, also known as the CARERS Act. This bipartisan, bicameral bill would allow states to set their own policies on medical marijuana, allow states to import Cannabidiol to treat patients with seizures, give the Veterans Administration physicians the ability to recommend medical marijuana to patients and improve opportunities for research on marijuana.

The consensus on medical marijuana is already overwhelming and continues to build. According to a Quinnipiac University poll, 93 percent of Americans believe people should be allowed to use medically prescribed marijuana.

93 percent of Americans rarely agree on anything.

In November, North Dakota, Montana, Florida and Arkansas joined a growing majority of states that have legalized medical marijuana. Twenty-nine states plus the District of Columbia have approved medical marijuana.

Even CNN's Chief Medical Correspondent Dr. Sanjay Gupta, who was once skeptical of medical marijuana, has publicly endorsed it.

Yet, our federal laws continue to treat patients and the doctors and families who care for them like criminals.

It is long overdue for our federal law to reflect the common sense views of 93 percent of Americans and stop adding to the suffering of those with horrible illnesses.

One such patient was my constituent, Chloe Grauer. At 3 years old, Chloe suffered from a rare neurological disease that caused her to have 100 to 200 seizures a day. She tried dozens of medications and underwent surgical procedures but nothing stopped the seizures.

Her family tried desperately to treat her with Cannabidiol—also known as “Charlotte's Web” or “CBD” for short—which has been shown to treat certain diseases that cause seizures, such as the disease from which Chloe suffered. CBD is derived from cannabis plants, and even though it contains just trace

amounts of the psychoactive ingredient in marijuana—nowhere near enough to produce a high—but it is currently illegal under federal law. Even this tiny amount of the ingredient, THC, was enough for the federal government to keep a potentially life-saving drug away from Chloe.

Chloe died without receiving CBD.

This should never have happened. We must ensure that this never happens again.

Just as our children deserve to be treated compassionately, so, too, do our veterans. Federal law currently prohibits VA doctors from prescribing medical marijuana when they feel it is medically beneficial. Our veterans deserve the best medical advice from their doctors, not arbitrary limits on what their doctors can do to help them. Veterans are tough. They can handle frank advice from their doctors.

I want to thank my colleague DON YOUNG of Alaska for his partnership on this bill as well as Senators CORY BOOKER, KIRSTEN GILLIBRAND, RAND PAUL, MIKE LEE, AL FRANKEN and LISA MURKOWSKI for their leadership on this legislation. I urge both the House and Senate to pass this swiftly.

ANNASELIA SAMORA

HON. ED PERLMUTTER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 15, 2017

Mr. PERLMUTTER. Mr. Speaker, I rise today to recognize and applaud Annaselia Samora for receiving the Arvada Wheat Ridge Service Ambassadors for Youth award.

Annaselia Samora is a student at Jefferson High School and received this award because her determination and hard work have allowed her to overcome adversities.

The dedication demonstrated by Annaselia Samora is exemplary of the type of achievement that can be attained with hard work and perseverance. It is essential students at all levels strive to make the most of their education and develop a work ethic which will guide them for the rest of their lives.

I extend my deepest congratulations to Annaselia Samora for winning the Arvada Wheat Ridge Service Ambassadors for Youth award. I have no doubt she will exhibit the same dedication and character in all of her future accomplishments.

**MISSOURI CITY TEACHER
PARTICIPATES IN PBS PROGRAM**

HON. PETE OLSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 15, 2017

Mr. OLSON. Mr. Speaker, I rise today to congratulate Krissy Venosdale of Missouri City, TX, for being selected as a participant in the 2017 PBS Digital Innovators Program.

Krissy, who serves as the Kinkaid School's lower school innovation coordinator, was recognized for developing the “Launch Pad” at her school. The “Launch Pad” is a space for students to expand their horizons in both a creative and technological fashion, using a blend of bright colors and high-tech tools to

help students practice out-of-the-box methods. Out of the 52 participants selected, Krissy is the only educator from TX to participate in the PBS Digital Innovators Program. As part of this program, Krissy will have access to ongoing professional development, share her ideas on PBS platforms, utilize the PBS LearningMedia resources and attend the 2017 PBS Digital Summit this summer.

On behalf of the Twenty-Second Congressional District of Texas, congratulations again to Krissy Venosdale for being selected as a participant in the 2017 PBS Digital Innovators Program. We are extremely proud and are looking forward to her future innovative educational platforms.

**TRIBUTE TO DR. WALTER R.
BOYNTON**

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 15, 2017

Mr. HOYER. Mr. Speaker, I rise today to recognize the career and contributions to Maryland's Fifth District of estuarine ecologist Dr. Walter R. Boynton of St. Leonard, Maryland, on the occasion of his retirement.

A native of Massachusetts, Dr. Boynton first came to Maryland and encountered the majestic waters of the Chesapeake Bay, something which would become the focus of his scientific studies for the remainder of his career, in 1969 as a summer student at the Chesapeake Biological Laboratory (CBL) in Solomons, Maryland. Following the receipt of his Ph.D. in ecology from the University of Florida, Dr. Boynton returned to CBL in 1975 as a young professor. At that time his research focused on the decline of submerged aquatic vegetation. He recognized that these declines were related to increases in nutrients flowing into the Chesapeake that caused an overabundance of single-celled algae, which reduced the clarity of the water and ultimately led to deeper portions of the Bay becoming devoid of oxygen. Dr. Boynton was part of a team of CBL researchers, including Chris D'Elia, Jim Sanderson, and Don Heinle, that redefined what we know about nutrient dynamics and how they bring about eutrophication—or the overabundance of plant life at the expense of animal life in bodies of water.

A long-standing relationship, forged on the softball diamond, between CBL researchers and the local community led to a close working partnership and deep personal friendship between Dr. Boynton and then-State Senator Bernie Fowler, who remains a close friend of mine. It was Senator Fowler who led efforts in federal court to force regional jurisdictions to adhere to the Clean Water Act. Former Senator Fowler credits Dr. Boynton with deepening his own understanding of the ecology of the Bay and the Patuxent River, allowing him to become an effective advocate and well-respected citizen-scientist, bringing attention to the restoration of the Chesapeake Bay. On June 11, I joined former Senator Fowler for his annual “wade-in” to check the clarity of the Patuxent River and learned of Dr. Boynton's upcoming retirement.

In addition to an internationally respected research career, Dr. Boynton has been a highly effective educator, teaching generations of
